Initial Plan

Candidate:

Plan Title:

Objectives:

Planning

Whether creating a long-term initial plan or a shorter-term assessment plan, SkilSure®'s S/NVQ is easy-to-use, flexible and accessible. It streamlines your processes by allowing for plans to be submitted and reviewed with just a few clicks. Consequently all those involved, including the candidate, assessor, and verifier, save time on cumbersome administrative work.

Creating an Initial Plan is simple: enter a plan title and the qualification; mandatory units will automatically be added. Then, fill in the optional units. Once the plan is saved, assessors, verifiers and other key members of the S/NVQ program are able to monitor the candidate's current development and their plans for the future.

SkilSure® S/NVQ facilitates compliance with national vocational qualifications by maintaining for each candidate an auditable record of plans, as well as the processes and metrics used to assess unit completion.
